

KULDEEP
Backend Developer

+91 9779781674 • bachelor97797@gmail.com • github.com/kuldeep525-bot • Chandigarh, India

PROFESSIONAL SUMMARY

Backend Developer with hands-on experience building production-ready RESTful APIs using Node.js, Express.js, and MongoDB. Skilled in JWT authentication, bcrypt, role-based access control, and OTP-based workflows. Strong understanding of MVC architecture and middleware-driven request handling. Collaborative team experience working on real-world projects.

TECHNICAL SKILLS

Backend & APIs: Node.js, Express.js, RESTful API Design, MVC Architecture, Middleware, Error Handling
Databases: MongoDB, Mongoose, SQL (Basic)
Auth & Security: JWT, bcrypt, Google OAuth, Role-Based Access Control, HTTP-Only Cookie Auth
Languages: JavaScript, C, C++
Tools: Git, GitHub, Postman, VS Code, Railway, Nodemailer, Brevo, Groq AI API

PROJECTS

1. Student Management System
Live: deploying-cyan.vercel.app | GitHub: github.com/kuldeep525-bot | Stack: Node.js, Express.js, MongoDB, JWT, bcrypt
- Designed 20+ RESTful APIs — authentication, student data management, PYQ content, and user activity states.
 - JWT auth, bcrypt hashing, Google OAuth, OTP-based password recovery, and Role-Based Access Control (Admin/User).
 - Built Favorite, Archive, Blocked, Soft Delete features with centralized error handling and optimized Mongoose schemas.
 - Deployed on Railway cloud platform; tested all APIs with Postman.
2. HunarHub — Local Services Marketplace
GitHub: github.com/kuldeep525-bot/HunarHub | Stack: Node.js, Express.js, MongoDB, JWT, bcrypt, Nodemailer, Groq AI
- Built a full-stack local services marketplace backend connecting users with skilled workers — electricians, plumbers, carpenters.
 - 3 role-based modules: User (book services), Worker (manage bookings) — each with dedicated controllers, routes, and middleware.
 - Complete Auth system — JWT + bcrypt, HTTP-Only cookies, OTP-based Forgot/Reset Password via Nodemailer.
 - Booking lifecycle — create, cancel, status updates (pending, accepted, rejected, completed) with ownership validation.
 - Review & Rating system — auto-updates worker average rating using weighted average formula after booking completion.
 - AI Chatbot using Groq API (Llama 3.3-70B) — assists users in Hindi and English to find the right worker category.

COLLABORATIVE EXPERIENCE

- Backend API Contributor — Gym Management Web Application
Collaborative Project with Senior Developer | 2025
- Worked alongside a senior developer on a Gym Management Web Application — private repository.
 - Contributed to backend API development: user authentication (JWT, bcrypt), email verification using Brevo/SendinBlue.
 - Gained hands-on experience in RESTful API design, middleware development, and team-based coding practices.

EDUCATION & CERTIFICATION

Bachelor of Computer Applications (BCA)	PGGC-11, Chandigarh	2023 – 2026
Backend Development Certificate (3 Months)	NICT, Sector 15, Chandigarh	2023
